

Anh Nhat Vu (Patrick Vu)

github.com/dotcomdomain | dotcomdomain.github.io | Ontario, Canada

PROFILE

First-year Bachelor of Technology student at McMaster University studying Automation Systems Engineering Technology (Co-op). Hands-on experience with C++, Python, Kotlin, Git, Android/Linux tooling, and USB HID development through personal and school projects. Enjoys debugging practical systems that cross software and hardware, with customer-facing experience from volunteer work.

EDUCATION

McMaster University - Hamilton, ON | September 2026 - Present

Bachelor of Technology (BTech), Automation Systems Engineering Technology (Co-op)

Ontario Secondary School Diploma (OSSD) - Saunders Secondary School | June 2026

Honour Roll for 4 consecutive years. Selected Grade 12 marks: Business 91, English 91, Advanced Functions 90, Computer Engineering 90, Physics 90, Calculus 87.

TECHNICAL PROJECTS

USB Input Bridge / Android S Pen HID Client | Kotlin, Android, USB HID, Git/GitHub

- Extended an open-source rooted Android HID client so a phone can act as a USB keyboard, mouse, Windows Precision Touchpad, and S Pen input device without companion software on the host.
- Added S Pen input modes, Windows Precision Touchpad reports, and Samsung Exynos USB gadget handling, including preserving ADB while rebuilding the USB gadget.
- Built a Material 3 interface with fullscreen touchpad controls, diagnostics, onboarding/help, and configurable sensitivity and tracking settings.

C++ Factory / Resource Management Game | C++, SFML

- Built a tile-based 2D automation game with real-time rendering, keyboard command input, multiple generated levels, and procedural terrain.
- Implemented resource extraction and processing systems using drills, fluid pumps, furnaces, plate presses, and gear presses.

VOLUNTEER EXPERIENCE

Food Truck Volunteer | 15 hours

- Took customer orders, helped prepare food, and served customers in a fast-paced team environment.

Saunders School 50th Anniversary Event Staff | 12 hours

- Welcomed alumni and guests, helped set up tables and chairs, and served drinks during the event.

School Math Tutor | 5 hours

- Supported students with math questions, practice problems, and step-by-step explanations.

SKILLS

Programming & Tools	C++, Python, Kotlin (project experience), basic HTML/CSS/JavaScript, SFML, Git, GitHub, GitLab, Linux, Android/ADB
Productivity	Microsoft Office, Google Workspace, documentation, organized note-taking
Strengths	Fast learner, problem solving, attention to detail, technology-focused, reliable teamwork
Languages	English, Vietnamese, French (basic)
